# Discussion

# Inactive patron removal process: recap & overview

# Purposes of automation of record removal

**Keep the database as clean  
and efficient as possible**

**Avoid retaining personally  
identifiable information  
unnecessarily**

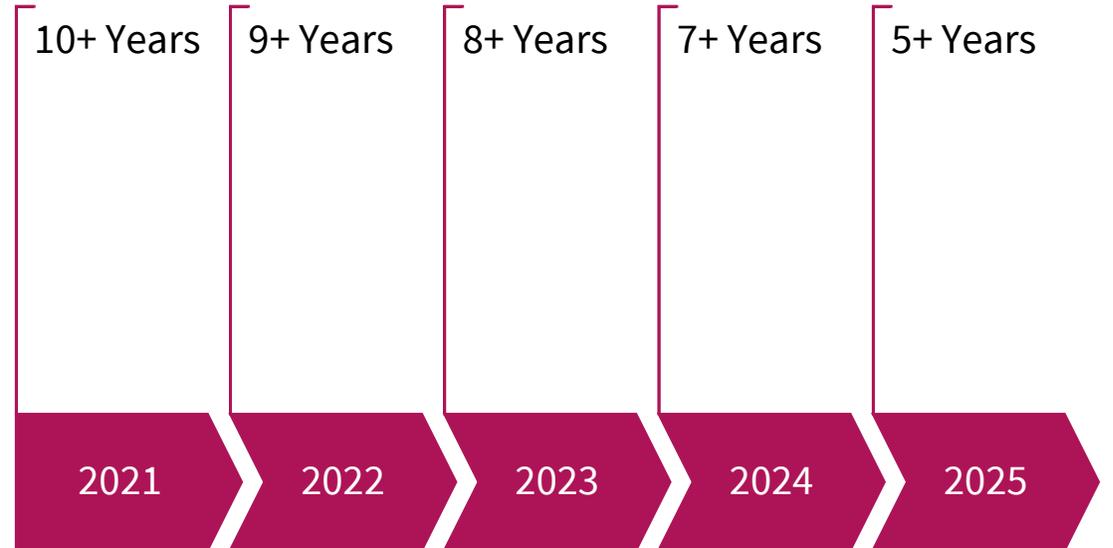

**Reduce library staff time  
necessary for record  
maintenance**

# Timeline

# Last Activity Date

- Planned reduction over time from 10+ years to 5+ years.
- No further adjustments are planned

## Final Criteria

Patron records will be candidates for removal if and only if:

- Last Activity Date is over 5 years in the past.
- Total of patron's bills is less than \$100.

## The 2025 Jump

Reasons for large 2025 removal numbers:

1. Two-year change in purge threshold.
2. 2018 NCOA processing updated Last Activity Date (LAD)
  - Many of these records would have been purged prior to now

## Processes that update Last Activity Date

- Checking in/out or renewing an item
- Placing/Editing/Removing a hold
- Marking an item lost
- Billing a user or paying a bill
- Creating a user
- Editing address information
- Authenticating via OpenAthens
- Authenticating via SIP2 (self-checks, computer reservation, OverDrive login activity)

## Removal of Old Bills

---

SWAN has recommended removal of bills over 10 years old

---

We understand concerns about certain bad actors

---

Retaining certain delinquent accounts can protect you and other SWAN libraries
